PROFESSIONAL PROFILE

Enterprise infrastructure and operations professional with 17+ years across manufacturing, education, public-sector, consulting, and multi-site environments. Strong across networking, Windows infrastructure, Active Directory and hybrid identity, Microsoft 365, virtualization, storage, endpoint operations, and technical escalation. Known for following the packet path, testing assumptions, and turning vague symptoms into documented root cause, practical remediation, and supportable operations.

CORE EXPERTISE

Infrastructure & Systems: Windows Server, Hyper-V, VMware vSphere/ESXi, enterprise storage, backup/recovery, disaster recovery

Networking: Routing, switching, VLANs, DNS, DHCP, wireless, firewalls, fiber/WAN, segmentation, packet-path troubleshooting

Identity & Microsoft: Active Directory, Group Policy, Microsoft Entra ID, hybrid identity, Microsoft 365, MFA, AD Connect

Endpoint & Operations: MECM/SCCM, endpoint management, incident escalation, vendor coordination, technical documentation, operational continuity

Automation & Diagnostics: PowerShell, .NET/C# tooling, Wireshark, repeatable diagnostics, root-cause analysis, support workflow design

PROFESSIONAL EXPERIENCE

Information Technology Coordinator | Indorama Ventures / StarPet Inc.

Asheboro, NC | Mar 2025 - Present

- Support plant IT operations across infrastructure, networks, Windows endpoints, identity, Microsoft 365, business applications, and onsite user services in a PET resin manufacturing environment.
- Troubleshoot Active Directory and hybrid identity, MFA, MECM-managed endpoints, DNS/DHCP, VLANs, switching, wireless, firewalls, application access, and path-specific authentication failures.
- Translate incidents into tested hypotheses, packet-path evidence, concise escalation notes, and coordinated action with global IT teams, managed service providers, and vendors.
- Build repeatable PowerShell diagnostics, checklists, and support workflows that reduce guesswork and improve handoff quality during recurring infrastructure issues.

Network Systems Analyst / Technology Supervisor | Asheboro City Schools

Asheboro, NC | Aug 2023 - Nov 2024

- Managed and improved district LAN/WAN, wireless, VLANs, Active Directory, Group Policy, Microsoft 365, Google Workspace, and core infrastructure across multiple school locations.
- Served as Tier 2/3 escalation for complex network, systems, identity, endpoint, and operational issues; strengthened segmentation, monitoring, vulnerability response, backup, disaster recovery, and access control practices.
- Coordinated vendor projects spanning VoIP, physical access, HVAC, cameras, scoreboards, paging, and other operational systems while supporting E-Rate, documentation, and staff cross-training.

Network Administrator | INLIVIAN (Charlotte Housing Authority)

Charlotte, NC | Aug 2021 - Aug 2023

- Administered 55+ locations connected to a centralized colocation datacenter in Charlotte, with secondary domain redundancy at INLIVIAN headquarters; supported Dell switching, Sophos firewalls, Cisco/Ruckus wireless, and Microsoft infrastructure.
- Maintained 20+ servers across multiple Hyper-V hosts and supported lifecycle, patching, monitoring, troubleshooting, documentation, and business continuity.
- Supported Dell EMC Isilon A300 storage across dual four-node production and disaster-recovery clusters, including storage networking, replication, monitoring, recovery procedures, and migration away from aging NAS platforms.
- Acted as primary IT point of contact for Spectrum fiber construction/connectivity work on newly acquired properties; also supported Microsoft 365 information-sharing safeguards and Purview eDiscovery for organizational legal requests.

Joshua C. McDonald

PROFESSIONAL EXPERIENCE · CONTINUED

Network Systems Engineer | Richmond Community College

Hamlet, NC | Nov 2020 - May 2021

- Supported hybrid Active Directory/Azure AD, Hyper-V, AWS-hosted Windows and Linux systems, campus networking, and wireless infrastructure.
- Led campus switching migration from Cisco to Extreme Networks and implemented Extreme Management Center (XMC) for centralized management and visibility.
- Improved Aerohive wireless performance and supported migration into the Extreme ecosystem while troubleshooting cloud, identity, virtualization, switching, wireless, and endpoint issues.

IT & Imaging Consultant | Carolina Business Equipment

North Carolina | Dec 2018 - Oct 2020

- Delivered imaging and IT consulting for education and business customers, translating workflow problems into implementation plans, migrations, deployments, troubleshooting, and handoff.
- Supported K-12 RFP, proposal, and project work through customer assessment, equipment planning, fulfillment, implementation coordination, and technical support.
- Won two major school-district RFPs, including Moore County Schools, working with the CBE team on discovery, solution planning, proposals, and implementation.
- Contributed to the Moore County Schools managed-print proposal covering 307 devices, secure print release, Active Directory / Google integration, and fleet configuration planning.

Owner | Little Guy Tech, LLC

Rockingham, NC | Dec 2016 - Apr 2017

- Operated a local technology business providing consumer-device repair, small-business support, consulting, and practical technology services.

IT Director / IT Operations Specialist II | Galey and Lord Industries

Society Hill, SC | 2012 - 2016

- Progressed from IT Operations Specialist II to IT Director while supporting manufacturing operations, business continuity, and international collaboration with a Cambodian sister operation.
- Administered Active Directory, domain services, Exchange, servers, networking, wireless, backups, PBX/communications, cabling, vendors, ERP-related devices, thin clients, handhelds, and production support.
- Supported secure site-to-site connectivity, including Cisco ASA VPN infrastructure, and coordinated priorities across operations, departments, vendors, and holding-company IT requirements.

Network Administrator / IT Services Coordinator | Carbis Inc. / Aluminum Ladder Co.

Florence, SC | 2009 - 2012

- Progressed from IT Services Coordinator to Network Administrator supporting a three-site manufacturing environment and a broad mix of infrastructure, ERP, network, server, and end-user operations.
- Supported Dynamics AX ERP implementation and a new data center rollout spanning Windows Server, Exchange, VMware ESXi/vSphere, HP blade/SAN infrastructure, backup/disaster recovery, Sophos, NEC PBX, DNS/DHCP/WSUS, and structured cabling.
- Built an early troubleshooting foundation around Wireshark, layered network analysis, documentation, vendor coordination, and practical root-cause isolation.

IT Student Help Desk Technician | Pfeiffer University

Misenheimer, NC | May 2007 - Aug 2009

- Provided front-line campus support for workstations, printers, equipment, dorm-network connectivity, physical jacks/patching, and user troubleshooting.

EDUCATION

Bachelor of Science, Computer Information Systems | Pfeiffer University - Misenheimer, NC | 2009

International / Chinese Studies Certificate | Shanxi University - Taiyuan, China | 2008

Associate in Applied Science, Computer Information Systems / Network Administration | Richmond Community College - Hamlet, NC | 2007
